## EXPERIENCE

### Silicon Africa LLC, Nigeria — Frontend development intern

OCT 2020 - JAN 2021

- Learned how to build accessible and performant web applications with HTML, CSS, and JavaScript.
- Built responsive web applications that communicated with Backend APIs.
- Collaborated with other engineers on daily basis to design, build and improve full-stack web applications.

### Utica Inc, Remote — Product design intern

JAN 2021 - MARCH 2021

- Worked with a group of designers to research, design, and iterate through existing products to enhance user experience.
- Learned core design principles and how to design user interfaces to ensure the users don't suffer horrible experiences.
- Worked with my team to implement industry design standards in several products which helped me develop a better mental model for building excellent products.

## EDUCATION

### Nnamdi Azikiwe University, Nigeria — Bachelor of Pharmacy

OCT 2019 - AUG 2024

Cumulative GPA: 4.65/5.0

### AltSchool Africa, Nigeria — Diploma Software engineering

APRIL 2022 - APRIL 2023

**Relevant Coursework:** Computer science fundamentals, Computer programming, Data structures, Algorithms.

## PROJECTS

### Minotes — web app

A web application for making simple notes. Built with React, Framer

## SKILLS

**Languages:** HTML, CSS, SCSS, JavaScript(ES6), Typescript, Python.

**Libraries/Frameworks:** React, NextJS, Styled-components, TailwindCSS, Framer motion, Express.

**Tools:** Git, Github, Netlify, Vercel, Webpack, Parcel, NPM, Firebase, Cloudinary.

**Learning:** Data structures, Algorithms.

**Interests:** React Native, Blockchain(Solidity), Machine Learning, Math, System Design.

## CERTIFICATIONS & TRAINING

**JavaScript Fundamentals**  
(Frontend masters).

**Data structures and Algorithms** (Freecodecamp)

**Math for computer science**  
(MIT OpenCourseWare)

## LEADERSHIP

**Genesys Tech Hub Campus Ambassador** (2021 - Present): Teaching students

motion and Styled-components. [View project](#)

### **Octomigo — web app**

A simple web application that is used to search for Github users. Built with React, Github REST API, and Styled components. [View project](#)

### **Marche — Landing page**

A landing page website for a fictional digital marketing agency that provides digital services that fuel business growth. [View project](#)

### **Fiber — Landing page**

A landing page website for an online marketplace that sells portfolio website templates for developers. Part of the challenge on the frontend mentor website. [View project](#)

JavaScript, CSS, and the Fundamentals of UI design.

### **Cowrywise Student**

#### **Ambassador (2021 - Present):**

Helping students learn the importance of financial literacy.
